30-Second Interview Pitch

I built a six-project manager portfolio across operations, IT project management, product operations, marketing, supply chain, and people operations. Each project includes a charter, stakeholder map, KPI dashboard, risk register, action plan, source data, implementation playbook, and executive readout. It shows I can define business problems, align stakeholders, manage priorities, track KPIs, reduce risk, and deliver measurable outcomes.

Project-by-Project Value

1. Retail Operations Manager Store Performance Turnaround

Role simulated: Retail Operations Manager / Assistant Store Manager

Business problem: Store performance was being hurt by high labor cost, long wait times, lower NPS, shrink, and inconsistent schedule adherence.

Best job matches: Operations Manager, Assistant Manager, Retail Manager, Store Manager, Business Operations Analyst

KPI wins:

Labor Cost %: 18.9% to 16.5% (Exceeded)

Avg Wait Time: 8.4 min to 5.2 min (Exceeded)

NPS: 52 to 68 (Exceeded)

Shrink %: 3.8% to 2.4% (Exceeded)

2. IT Project Manager CRM Implementation

Role simulated: IT Project Manager / Business Project Manager

Business problem: The sales team lacked consistent CRM adoption, clean pipeline data, and daily sales visibility for leadership reporting.

Best job matches: IT Project Manager, Project Coordinator, Business Analyst, CRM Analyst, Sales Operations Analyst

KPI wins:

User Adoption: 0% to 93% (Exceeded)

Migrated Records: 0 to 4,812 (Met)
